

Water Damage

Water damage is one of the most common forms of damage to both residential and commercial properties. Damage is generally caused by flooding, fire suppression, or burst pipes. The drying process must be completed quickly and documented correctly before further restoration can begin.

Failure to do so can often lead to expensive and timely mitigation problems and mould and mildew, or require extra time in the reconstruction process. Tersus' rapid response helps reduce the occurrence of secondary losses. We can handle all of your drying needs, no matter what the scope and scale. From water extraction to dehumidification, residential, commercial or industrial, Tersus has the knowledge and expertise to ensure rapid and efficient drying.

Tersus document the drying process and minimise the risk of mould and mildew development. For commercial or industrial losses, all of these resources are critical to minimise business interruption and maintain continuity.

Call our **helpline** on **1890 354 354** for advice and information on Flood and Water Damage throughout Ireland.

Water Damage Services Include:

- Water Extraction
- Complete Structural Drying
- Dehumidification
- Contents Stabilisation
- Moisture Mapping
- Thermal Imaging
